Advisors

Advisors to 'Marine Ecology – Progress Series' are appointed for a four-year period. They are expected to:

- ○ critically evaluate the scientific merits of manuscripts submitted for publication
- ○ suggest topics and authors for reviews
- ○ select and present suitable high-quality manuscripts
- ○ draw attention to new facts, concepts and methods

In addition to the advisors listed below, about 100 referees cooperate anonymously.

ENVIRONMENTAL FACTORS

Alderdice, D., Dr.
Pacific Biological Station, Nanaimo, B.C. V9R 5K6, Canada
Responses to environmental stress

Dring, M. J., Dr.
Botany Dept, The Queen's Univ. of Belfast, Belfast BT7 1NN, Northern Ireland
Physiological ecology of algae

Egami, N. N., Prof.
Zoological Institute, Faculty of Sciences, Univ. of Tokyo, Hongo, Tokyo 113, Japan
Effects of radioactivity

Gunkel, W., Dr.
Biologische Anstalt Helgoland, D-2192 Helgoland, Federal Republic of Germany
Environmental effects on bacterial growth

Haedrich, R. L., Prof.
Memorial University of Newfoundland, St. John's, Nfld. A1B 3X9, Canada
Environmental effects on fishes

Hedgpeth, J., Prof.
5660 Montecito Avenue, Santa Rosa, Calif. 95404, USA
Temperature effects on marine organisms

Iwai, T., Prof.
Department of Fisheries, Kyoto University, Kyoto, Japan
Environmental effects on early life history and histology of fishes

Jansson, B.-O., Prof.
Askö Lab., Inst. of Mar. Ecol., Univ. of Stockholm, Box 6801, S-113 86 Stockholm, Sweden
Environmental effects on invertebrates

Lawrence, J., Prof.
Dept of Biology, Univ. of South Florida, Tampa, Fla 33620, USA
Physiological ecology of invertebrates

MacLeod, R. A., Prof.
Dept of Microbiology, MacDonald Campus of McGill Univ., MacDonald College, Que. H9X 1C0, Canada
Physiological ecology of microorganisms

Morita, R. Y., Prof.
Dept of Microbiology, Oregon State Univ., Corvallis, Oreg. 97331, USA
Environmental effects on microorganisms

Newell, R. C., Prof.
Institute for Marine Environmental Research, Prospect Place, The Hoe, Plymouth PL1 3DH, England
Environmental relations of intertidal animals

Nultsch, W., Prof.
Fachbereich Biologie der Philipps-Univ., Lahnberge, D-355 Marburg, Federal Republic of Germany
Light effects on plants; locomotion of microorganisms

Rheinheimer, G., Prof.
Institut für Meereskunde, Univ. Kiel, Düsternbrooker Weg 20, D-2300 Kiel, Federal Republic of Germany
Environmental effects on microorganisms

Scheltema, R. S., Dr.
Woods Hole Oceanographic Institution, Woods Hole, MA 02543, USA
Biogeography and evolution of benthic invertebrates

Segal, E., Prof.
Dept of Biology, California State Univ., Northridge, Calif. 91330, USA
Physiological ecology of invertebrates

Siebers, D., Dr.
Biologische Anstalt Helgoland, Palmaille 9, D-2000 Hamburg 50, Federal Republic of Germany
Physiological ecology of invertebrates

Sindermann, C. J., Dr.
U.S. Dept of Commerce, NOAA, National Marine Fisheries Service, Northeast Fisheries Center, Sandy Hook Laboratory, Highlands, N. J. 07732, USA
Environmental effects on pollution-associated diseases

Southward, A. J., Dr.
The Laboratory, Citadel Hill, Plymouth PL1 2PB, England
Environmental effects on invertebrates

Tokin, I. B., Prof.
Murmansk Marine Biol. Station, Academy of Sci., USSR, Murmansk, USSR
Environmental effects on functional cytology

Vernberg, J., Prof.
Belle W. Baruch Institute for Marine Biol. and Coastal Res., Univ. of South Carolina, Columbia, S. C. 29208, USA
Physiological ecology of invertebrates

Winter, J. E., Dr.
Instituto de Zoología, Univ. Austral de Chile, Casilla 567, Valdivia, Chile
Physiological ecology of invertebrates

Woodhead, D. S., Dr.
Ministry of Agriculture, Fisheries and Food, Fisheries Radiobiological Lab., Hamilton Dock, Lowestoft, Suffolk NR32 1DA, England
Effects of radioactivity

ZoBell, C. E., Prof.
Scripps Institution of Oceanography, San Diego, P.O.B. 1529, La Jolla, Calif. 92093, USA
Environmental effects on microorganisms

PHYSIOLOGICAL MECHANISMS

Battaglia, B., Prof.
Istituto di Biologia Animale dell'Università, Via Loredan 10, I-35100 Padova, Italy
Population genetics; evolution

Bayne, B. L., Dr.
Institute for Marine Environmental Research, 67/69 Citadel Road, Plymouth PL1 3DH, England
Comparative physiology

Beardmore, J. A., Prof.
Univ. College of Swansea, Dept of Genetics, Singleton Park, Swansea SA2 8PP, U.K.
Adaptation; selection

Bonotto, S., Prof.
Centre d' Etude de l'Energie Nucléaire, Lab. du C.E.N./S.C.K., B-2400 Mol, Belgium
Cellular biology

Bulnheim, H.-P., Prof.
Biologische Anstalt Helgoland, Palmaille 9, D-2000 Hamburg 50, Federal Republic of Germany
Metabolic performance of invertebrates; reproductive biology

Costlow, J. D., Jr., Prof.
Duke University Marine Laboratory, Pivers Island, Beaufort, N.C. 28516, USA
Developmental physiology; endocrinology

Enright, J. T., Prof.
Scripps Institution of Oceanography, San Diego, P.O.B. 1529, La Jolla, Calif. 92093, USA
Biological rhythms

Floc'h, J.-Y., Dr.
Lab. de Physiologie Végétale, Faculté des Sciences, Ave Victor le Gorgeau, F-29283 Brest, France
Metabolic processes of algae

Gilles, R., Prof.
Institute de Zoologie, Univ. de Liège, Qua Van Beneden, 22, B-4020 Liège, Belgium
Osmoregulation; cell-volume control

Gundersen, K., Prof.
Dept of Marine Microbiology, Univ. of Göte borg, Carls Skottsbergs Gata 22, S-413 1 Göteborg, Sweden
Microbial processes in the nitrogen cycle

Holland, N. D., Dr.
Scripps Institution of Oceanography, Sa Diego, P.O.B. 1529, La Jolla, Calif. 9209 USA
Comparative, cellular and developmenta physiology

Humphrey, G. F., Dr.
CSIRO Marine Biochemistry, Building A1 Sydney Univ., N.S.W. 2006, Australia
Photosynthesis; plankton biochemistry

Levandowsky, M., Dr.
Haskins Laboratories at Pace Univ., 41 Par Row, New York, N.Y. 10038, USA
Chemosensory mechanisms

Naylor, E., Prof.
Dept of Marine Biology, Univ. of Liverpoo Port Erin, Isle of Man, U.K.
Behavioural physiology

andian, T. J., Prof.
chool of Biological Sciences, Madurai Kaaraj Univ., Madurai 625 021, Tamilnadu, dia
ioenergetics

ussell, G., Dr.
ept of Botany, Univ. Liverpool, P.O.B. 147, iverpool L69 3BX, England
enetics of algae

iebers, D., Dr.
iologische Anstalt Helgoland, Palmaille 9, -2000 Hamburg 50, Federal Republic of ermany
omparative biochemistry of invertebrates

hirmunsky, A. V., Prof.
nstitute of Marine Biology, Vladivostok 9002, USSR
Mechanisms of cellular resistance and conol

CULTIVATION

ardach, J. E., Prof.
ast-West Resources Systems Institute, The ast-West Center, 1777 East-West Road, Hoolulu, Hawaii 96848, USA
eneral aspects of cultivation; aquaculture

ilio, M., Dr.
entro Ricerche Ittiologiche di Comacchio, . I. VAL. CO., Via Mazzini 200, I-44022 omacchio, Italy
quaculture

onotto, S., Prof.
entre d'Étude de l'Énergie Nucleaire, Lab. u C.E.N./S.C.K., B-2400 Mol, Belgium
ultivation of multicellular algae (including quaculture)

arriker, M. R., Prof.
ollege of Marine Studies, Univ. of Delawae, Lewes, Delaware 19958, USA
ultivation of molluscs

roop, M. R., Dr.
cottish Marine Biological Ass., Dunstaffnae Marine Res. Lab., P.O.B. 3, Oban, Argyll A34 4AD, Scotland
utrition of algae

udok van Heel, W. H., Dr.
olfinarium Harderwijk, Strandboulevard, arderwijk, The Netherlands
ultivation of marine mammals

loc'h, J.-Y., Dr.
ab. de Physiologie Végétale, Faculté des ciences, Ave Victor le Gorgeau, F-29283 rest, France
utrition of algae

alver, J. E., Prof.
ollege of Fisheries, Univ. of Washington, eattle, Wash. 98195, USA
utrition of fishes

awrence, J., Prof.
ept of Biology, Univ. of South Florida, Tama, Fla 33620, USA
utrition of invertebrates

evandowsky, M., Dr.
askins Laboratories at Pace Univ., 41 Park ow, New York. N.Y. 10038, USA
icrocosm cultures

agne, F., Prof.
niv. de Paris VI, Inst. de Biologie Végétale, ER 59, 7, Quai Saint-Bernard, F-75230 Pas, Cedex 05, France
ultivation of algae (excluding aquaculture)

Paffenhöfer, G.-A., Dr.
Skidaway Institute of Oceanography, Univ. System of Georgia, P.O.B. 13687, Savannah, Georgia 31406, USA
Cultivation of zooplankton

Pandian, T. J., Prof.

Management of wadden-sea areas

MARINE ECOLOGY – PROGRESS SERIES

History: 'Marine Ecology – Progress Series' was established in response to requests from numerous marine ecologists from all over the world. The series is based on 'Marine Ecology' – the first comprehensive, integrated treatise on life in oceans and coastal waters – conceived, organized and edited by Professor Otto Kinne and published by Wiley & Sons.

Aim: 'Marine Ecology – Progress Series' serves as world-wide forum for all aspects of marine ecology, fundamental and applied. The journal covers microbiology, botany, zoology, biological oceanography, fisheries, aquaculture, pollution, environmental protection, diseases, conservation and resource management.
Ecological research has become of paramount importance for man's future. The information presented here should, therefore, encourage critical application of ecological knowledge for the benefit of mankind and, in fact, of life on earth. 'Marine Ecology – Progress Series' strives for

- complete coverage of the field of marine ecology
- the highest possible quality of papers
- quick publication
- a high technical standard of presentation.

These goals can be achieved only in close cooperation with contributors, advisors and readers. Hence, criticism and advice are cordially invited (please address to the editor).

Scope: 'Marine Ecology – Progress Series' is international and interdisciplinary. Presenting original papers, short notes and reviews, it has been created for prompt publication of contributions concerned with:

I. Environmental Factors: Tolerances and responses of marine organisms (microorganisms, autotrophic plants, and animals) to variations in abiotic and biotic components of their environment; radioecology.

II. Physiological Mechanisms: Synthesis and transversion of organic material (mechanisms of auto- and heterotrophy); thermo-, ion-, osmo- and volume regulation; stress resistance; non-genetic and genetic adaptation; population genetics; orientation in space and time; migrations; behaviour.

III. Cultivation: Maintenance and rearing of, as well as experimentation with, marine organisms under environmental and nutritional conditions which are, to a considerable degree, controlled; analysis of the physiological and ecological potential of individuals, populations and species; determination of nutritional requirements; ecological aspects of aquaculture; water-quality management; culture technology.

IV. Dynamics: Production, transformation, and decomposition of organic matter in marine ecosystems; food webs; trophic interrelations; population dynamics; plankton ecology; benthos ecology; estuarine and coastal ecology; wadden-sea ecology; coral-reef ecology; deep-sea ecology; open-ocean ecology; polar ecology; theoretical ecology; ecological modelling; evolution. Diseases of marine organisms.

V. Ocean Management: Organismic zonations and assemblages; worldwide marine organic resources; all aspects of fisheries; pollution of marine environments; protection of life in the seas; management of populations, species, ecosystems and sea areas.

Price per volume: 195 DM (1980); 219 DM (1981) plus postage and handling. Air-mail service available at special rate. For their personal use, individual members of scientific institutions can subscribe to 'Marine Ecology – Progress Series' at a substantially reduced price, providing they contribute as authors and their institutional library subscribes to the journal. Contact the publishers for details.

Subscription: Price per volume and number of volumes per annum are subject to change. For each calendar year both will be fixed towards the end of the preceding year. For further information write to Inter-Research, P.O.B. 1121, D-2083 Halstenbek, Federal Republic of Germany.

Appearance: Volumes 2–3, 1980; Volumes 4–6, 1981.

Manuscript Preparation, Mailing and Processing

Preparation

Original papers (in general not exceeding 10 printed pages), short notes (1–3 printed pages) and reviews (in general up to 40 printed pages) must be typewritten with double spacing. 'Marine Ecology – Progress Series' invites interpretative rather than descriptive contributions. Reviews should be critical, instructive evaluations of the state-of-the-art – not mere compilations of information.

Abstracts. All contributions must be preceded by a brief, concise abstract. In the shortest possible way, the abstract should outline the scope of the paper and highlight its main results and conclusions.

Figures must be very carefully prepared, numbered and accompanied by brief, precise legends. For examples consult recent issues. Mark desired position of figures in the manuscript margin.

Tables should not be excessive in size. They must be numbered and be headed by brief, descriptive legends. Mark desired position of tables in the manuscript margin. Unusual symbols used must be explained.

Genus and species names: underline for *italics*. Genus names should appear in full the first time mentioned in a given paragraph.

Citation of literature. All literature quoted in the text must be listed, in alphabetical order of author names, at the end of the manuscript. Please abbreviate publications according to 'World List of Scientific Periodicals', latest edition, London. For examples of literature citation see below.

Mailing

Address manuscripts (original plus 2 copies) to an advisor or to the editor. For safety use registered mail. The receipt of a manuscript will be acknowledged immediately.

Processing

Manuscripts are critically reviewed. The editor then decides on acceptance or rejection. Acceptable manuscripts are usually returned to the author requesting consideration of comments and criticism.

When an accepted manuscript is ready for publication, the author will be notified and the date of manuscript acceptance fixed. This date appears at the end of each printed contribution.

The author receives 2 sets of proofs directly from the printer. Printing errors must be carefully corrected. At this stage, stylistic changes are not acceptable without compensatory payment. Please return 1 set of proofs to the editor (where applicable by air mail).

Offprints: Sixty offprints of each contribution will be made available free of charge. Any number of additional offprints can be purchased. Orders for additional offprints must be made when returning the proof. For reprint prices consult the form accompanying the proofs.

'Marine Ecology – Progress Series' levies no page charge.

REVIEW

Officer, C. B., Ryther, J. H.
The Possible Importance of Silicon in Marine Eutrophication 83–91

Volume 3 · Number 2 · 1980

oosenburg, W. H., Rhoderick, J. C., Block, R. M., ennedy, V. S., Gullans, S. R., Vreenegoor, S. M., osenkranz, A., Collette, C.
ffects of Chlorine-Produced Oxidants on Survival of arvae of the Oyster *Crassostrea virginica* 93–96

Warwick, R. M., Uncles, R. J.
istribution of Benthic Macrofauna Associations in he Bristol Channel in Relation to Tidal Stress 97–103

toner, A. W.
erception and Choice of Substratum by Epifaunal mphipods Associated with Seagrasses 105–111

luppert, H.-W., Laudien, H.
nfluence of Pretreatment with Constant and Changng Temperatures on Heat and Freezing Resistance n Gill-Epithelium of the Mussel *Mytilus edulis* 113–120

Woo, N. Y. S., Fung, A. C. Y.
tudies on the Biology of the Red Sea Bream *Chryophrys major.* I. Temperature Tolerance 121–124

earre, S., Jr.
eeding by Chaetognatha: The Relation of Prey Size o Predator Size in Several Species 125–134

Maurer, D., Leathem, W.
Dominant Species of Polychaetous Annelids of Georges Bank 135–144

Shimura, S.
Ecological Aspects of *Proctoeces ichiharai* (Trematoda: Digenea) Parasitic in *Batillus cornutus* (Gastropoda) 145–149

Griffiths, R. J.
Natural Food Availability and Assimilation in the Bivalve *Choromytilus meridionalis* 151–156

Yoneshigue Braga, Y.
Growth of *Acetabularia calyculus* in Three Different Media 157–161

SHORT NOTE

Bulnheim, H.-P., Scholl, A.
Evidence of Genetic Divergence Between Two Brackish-Water Gammaridean Sibling Species 163–165

REVIEW

Loya, Y., Rinkevich, B.
Effects of Oil Pollution on Coral Reef Communities 167–180

Volume 3 · Number 3 · 1980

Dowd, C. E., Houde, E. D.
Combined Effects of Prey Concentration and Photoperiod on Survival and Growth of Larval Sea Bream, *Archosargus rhomboidalis* (Sparidae) 181–185

Krajnović-Ozretić, M., Ozretić, B.
The ALA-D Activity Test in Lead-Exposed Grey Mullet *Mugil auratus* 187–191

Flint, R. W., Rabalais, N. N.
Polychaete Ecology and Niche Patterns: Texas Continental Shelf 193–202

Shafir, A., Field, J. G.
Importance of a Small Carnivorous Isopod in Energy Transfer 203–215

Fukazawa, N., Ishimaru, T., Takahashi, M., Fujita, Y.
A Mechanism of 'Red Tide' Formation. I. Growth Rate Estimate by DCMU-Induced Fluorescence Increase 217–222

Schleyer, M. H.
A Preliminary Evaluation of Heterotrophic Utilisation of a Labelled Algal Extract in a Subtidal Reef Environment 223–229

Gunnill, F. C.
Recruitment and Standing Stocks in Populations of One Green Alga and Five Brown Algae in the Intertidal Zone Near La Jolla, California, During 1973–1977 231–243

Bell, S. S., Sherman, K. M.
A Field Investigation of Meiofaunal Dispersal: Tidal Resuspension and Implications 245–249

Meyer-Reil, L.-A., Faubel, A.
Uptake of Organic Matter by Meiofauna Organisms and Interrelationships with Bacteria 251–256

Stoecker, D.
Relationships Between Chemical Defense and Ecology in Benthic Ascidians 257–265

Hamilton, E. I., Clifton, R. J.
Concentration and Distribution of the Transuranium Radionuclides $^{239}+^{240}Pu$, ^{238}Pu and ^{241}Am in *Mytilus edulis, Fucus vesiculosus* and Surface Sediment of Esk Estuary 267–277

Volume 3 · Number 4 · 1980

Ryther, J. H., Sanders, J. G.
Experimental Evidence of Zooplankton Control of the Species Composition and Size Distribution of Marine Phytoplankton 279–283

Jeffrey, S. W., Hallegraeff, G. M.
Studies of Phytoplankton Species and Photosynthetic Pigments in a Warm Core Eddy of the East Australian Current. I. Summer Populations 285–294

Jeffrey, S. W., Hallegraeff, G. M.
Studies of Phytoplankton Species and Photosynthetic Pigments in a Warm Core Eddy of the East Australian Current. II. A Note on Pigment Methodology 295–301

Vanhaecke, P., Sorgeloos, P.
International Study on *Artemia.* XIV. Growth and Survival of *Artemia* Larvae of Different Geographical Origin in a Standard Culture Test 303–307

Wallis, G. P., Beardmore, J. A.
Genetic Evidence for Naturally Occurring Fertile Hybrids Between Two Goby Species, *Pomatoschistus minutus* and *P. lozanoi* (Pisces, Gobiidae) 309–315

Bayne, B. L., Worrall, C. M.
Growth and Production of Mussels *Mytilus edulis* from Two Populations 317–328

Jørgensen, N. O. G., Kristensen, E.
Uptake of Amino Acids by Three Species of *Nereis* (Annelida: Polychaeta). I. Transport Kinetics and Net Uptake from Natural Concentrations 329–340

Jørgensen, N. O. G., Kristensen, E.
Uptake of Amino Acids by Three Species of *Nereis* (Annelida: Polychaeta). II. Effects of Anaerobiosis 341–346

Santos, S. L., Simon, J. L.
Response of Soft-Bottom Benthos to Annual Catastrophic Disturbance in a South Florida Estuary 347–355

Derenbach, J. B., Boland, W., Fölster, E., Müller, D. G.
Interference Tests with the Pheromone System of the Brown Alga *Cutleria multifida* 357–361

SHORT NOTE

Sorgeloos, P.
Availability of Reference *Artemia* Cysts 363–364

REVIEW

Johannes, R. E.
The Ecological Significance of the Submarine Discharge of Groundwater 365–375
